

# Per-Category Metric-Level Comparison Between ARDA-SR and Representative Baselines

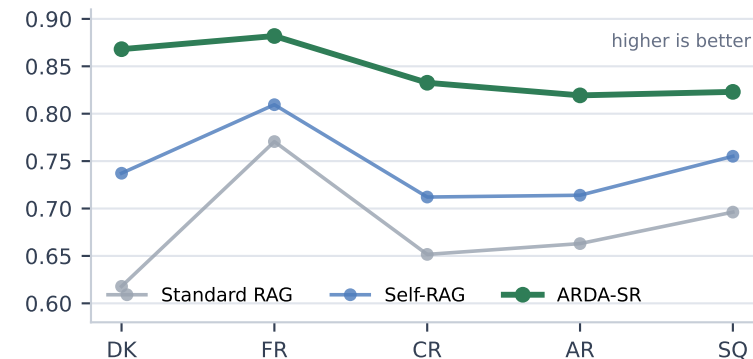

(a1) Relevance

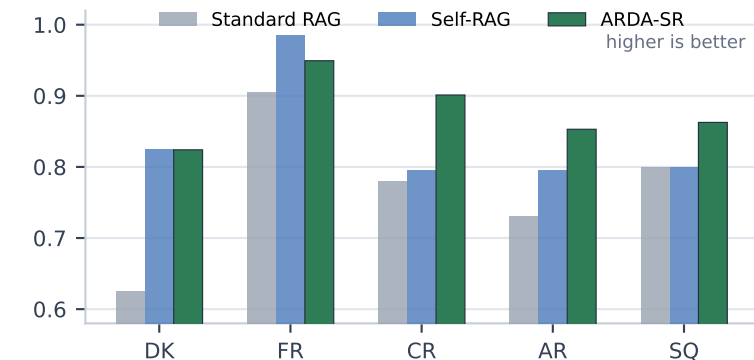

(a2) Faithfulness

(a3) Coverage

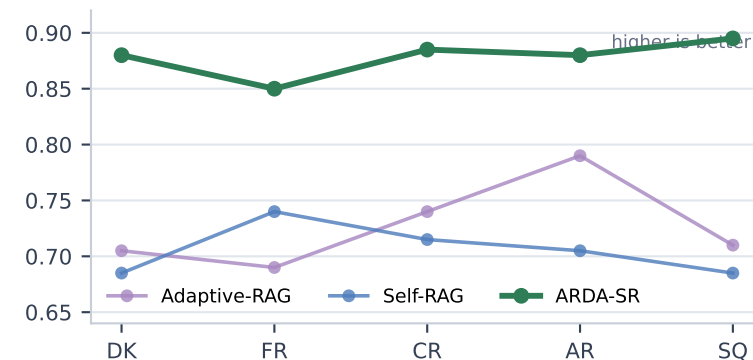

(b1) Hit@5

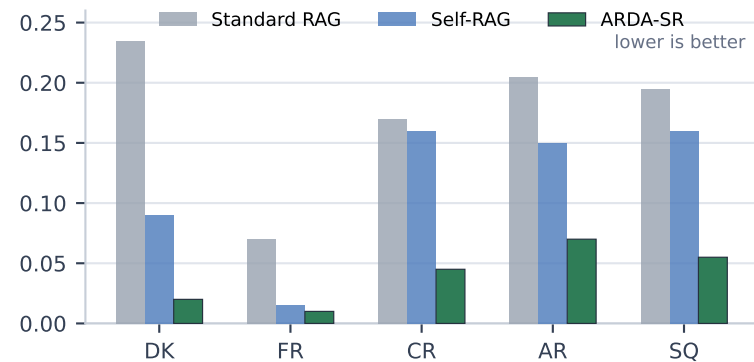

(b2) Context Relevance

(c) Tool Accuracy

(d1) False Rejection Rate

(d2) Latency

## Category key

DK: Direct Knowledge  
FR: Factual Retrieval  
CR: Complex Reasoning  
AR: Ambiguous Routing  
SQ: Scenario Query

## Reading guide

- ARDA-SR leads Rel., Cov., ToolAcc, and FRR across categories.
- FR retrieval is competitive with Self-RAG.
- SQ faithfulness is the nuanced case; PMR's clearest gain is FRR/decision behavior.
- Latency is the expected orchestration cost.
